TEIGNMOUTH
Community School

18th October 2018

Dear Parent/Guardian,

Re: GCSE Science Revision Guides

Your child has now entered their GCSE years and will be working towards the final GCSE exam. We have the opportunity to offer them revision guides, produced specifically for their course. The books are designed to help consolidate and support the work done at school by strengthening their understanding of the topics covered.

These books cover all topics that will be studied throughout their GCSE course. We are able to offer the AQA revision guide book at £6.00 each. If you wish to purchase these books, please use ParentPay which can accessed via the School's website. All purchases should be made by Friday 18th November.

Your son / daughter can use the revision guide to support their learning in Science by completing the following tasks:

1. Check their understanding of the current topics that they are studying.
2. Produce a set of revision notes or fact cards by condensing the sections into clear points. (These should be saved and used when preparing for tests throughout the course.)
3. Use the notes to prepare for end of unit tests and internal assessments

Yours sincerely,

Dr Racheal Adams
Head of Science
