Re: Year 9 Revision Guides

Dear Parent/Guardian,

To support and enhance students' learning in Science, we will loan a CGP revision guide to each student in year 9 that matches their course. At the end of the course in Year 11, the student will be asked to return the book in good condition so that they can be loaned out to Year 9 students for the next year.

If your son/daughter was unable to return the book at the end of Year 11 because it was lost or damaged, we will ask you to pay £6.00 so that we are able to replenish our stock.

Students will be given their book for the year 9 course once they have returned their KS3 book, or paid £3 to replace any lost KS3 books.

Of course, you may wish to purchase these books so that your son/daughter is able to write on or highlight the text in a way that you cannot when you use a loaned book. If this is the case, please use ParentPay which can accessed via the School's website. All purchases should be made by Friday 22nd October.

Your son / daughter can use the revision guide to support their learning in Science by completing the following tasks:

1. Check their understanding of the current topics that they are studying.
2. Produce a set of revision notes or fact cards by condensing the sections into clear points. (These should be saved and used when preparing for tests throughout the course.)
3. Use the notes to test themselves or others to check for understanding.

We also offer books on *how to revise* as this is often an area where parents can support students at home. These books are £2.00 to order via ParentPay and will aid revision in all subjects, not just Science.

Should your son/daughter choose Separate Science in Year 10 as part of their options, they can swap their revision guide at no extra cost whether on loan or purchased (assuming the book is in good condition to be used by other students).

Yours sincerely

Dr Racheal Adams
Head of Science Faculty
